

PERFORMANCE

# EYEWEAR

**THE STRONGEST, LIGHTEST, MOST COMFORTABLE FRAMES IN THE GAME.**

### FIT SYSTEM

#### THREE-POINT GRIP //

Nosebridge cradle and both temple tips act as a three-point grip system to provide a comfortable and secure fit.

#### ANTI-BOUNCE BRIDGE //

Eliminates bounce when vision matters most and comfortably cradles the nose. Traction improves when it gets wet with perspiration.

#### ADJUSTABLE NOSEPAD //

Nosepads on select styles adjust to accommodate variable sizes for a custom fit. Traction improves when it gets wet with perspiration.

### FRAME TECHNOLOGY

#### ARMOURFUSION™

ArmourFusion™ frames flex and retain their shape through the toughest conditions. Combining the element Titanium, which has the highest strength-to-weight ratio of any metal known to man, with Grilamid, a durable cutting-edge thermoplastic, results in ultra-lightweight, impact-resistant sunglasses frames.

## TECH SPECS

All of the lenses in the Under Armour Performance Eyewear collection block 100% of UVA, UVB, and UVC rays.

## LENS OPTIONS

#### PERFORMANCE POLARIZED

Polarized lenses provide high glare reduction and true color recognition under bright sunlight. Ideal for usage where heavy glare is a factor that could affect performance.

#### UA MULTIFLECTION™

Multiflection™ lenses use the most advanced lens coatings to eliminate staining and smudges. They are also highly scratch resistant and water-repellent and they are easier to clean than traditional lenses.

### LENS COLOR

### BENEFITS

GRAY //

Gray lenses are designed for speed and motion activities, offering true color recognition under bright sunlight. The most flexible lens option, ideal for varying sports and activities.

BROWN //

Brown lenses are engineered to provide optimum depth perception and a softening effect across fields of vision containing many objects or areas of focus. Ideal for outdoor enthusiasts like mountain bikers, climbers, hikers, etc.

GAME DAY //

Game Day lenses provide a unique balance of target and background brightness to provide optimum visual contrast and distinctive object illumination. Ideal for sports like baseball, softball and golf where it is imperative to pick a moving object (a ball) off of a background (the sky or the grass) quickly and accurately.

PHOTOCHROMIC //

Lenses adapt automatically to changing light conditions like the sun, shadows or fog.

BLUE or ORANGE MIRROR MULTIFLECTION //

Patented Multiflection™ lenses use the most advanced lens coatings to eliminate staining and smudges. They are also highly scratch-resistant and water-repellent, and they are easier to clean than traditional lenses.
