

BEYOND POLARIZED

THERE ARE POLARIZED LENSES
THEN THERE'S 580

COSTA 580G-LIGHTWAVE™ GLASS

Benefits of our most high-tech lenses:

- + Superior clarity
- + 20% thinner and 22% lighter than average polarized glass
- + 100% polarized to kill glare and reduce eye strain
- + 100% UV protected for maximum protection
- + U.S. Patent No. 6,334,680
- + U.S. Patent No. 6,604,824

COSTA 580P-PLASTIC

Benefits of C-WALL™ molecular bond lenses:

- + 580 clarity
- + Lightweight and durable
- + Impact- and scratch-resistant
- + Outperform every other lens in the industry
- + U.S. Patent No. 7,506,977
- + Repels oil, water and dust for ease of cleaning

COSTA 400G-LIGHTWAVE™ GLASS

These lenses put Costa on the map and still outperform the competition. Benefits of Costa 400G lenses:

- + 20% thinner and 22% lighter than average polarized glass
- + 100% polarized
- + 100% UV protected

CHOOSING A LENS COLOR

BRIGHT
LIGHT

BLUE MIRROR (10% LIGHT TRANSMISSION)
Made for the open water. Encapsulated mirrors (glass lenses only) deliver maximum contrast and color in full sun while eliminating reflected glare. Available in Costa 580G, 580P and 400G (gray base).

GREEN MIRROR (10% LIGHT TRANSMISSION)
Encapsulated mirrors (glass lenses only) offer enhanced visual acuity for fishing inshore, flats, rivers and streams. Available in Costa 580G (copper base) and 400G (amber base).

GRAY (12% LIGHT TRANSMISSION)
Perfect all-around choice for sports on water and land. Maintains color saturation and natural contrast in medium to bright sun conditions. Available in Costa 580G and 580P.

SILVER MIRROR (12% LIGHT TRANSMISSION)
Encapsulated mirrors (glass lenses only) optimize light transmission and enhance colors. Perfect for sight fishing or any outdoor activity with variable light. Available in Costa 580G and 580P (copper base).

COPPER (12% LIGHT TRANSMISSION)
Made for sight fishing, driving and everyday activities. Cuts glare and enhances contrast and color, providing eye comfort in any conditions. Available in Costa 580G and 580P.

AMBER (12% LIGHT TRANSMISSION)
Excellent all-around lens that delivers the brightest field of vision. Great choice for fishing, driving and activities where high contrast is needed. Available in Costa 580P.

SUNRISE (27% LIGHT TRANSMISSION)
A high-contrast specialty lens that allows maximum light transmission and enhances depth perception. Perfect for activities like fishing at dawn or dusk. Available in Costa 580P.

LIGHT CONDITIONS

LOW
LIGHT

Light transmissions are approximate, depending on Costa lens technology.
*Sunrise only available with select black, tortoise and camo frames.
Sunrise lenses do not pass ANSI Z80.3 traffic signal recognition and are not suitable for driving. **Add \$10 to retail for camo. *Available spring 2014.
