

FRONT

- 1 WATER-REPELLENT LAYER**
Tightly packed fluorinated molecules coat the lens, repelling smudges, oil, and water.
- 2 SCRATCH RESISTANT LAYER**
A tough scratch resistant coating is applied to both sides of the lens, reducing damage to the surface of the lens.
- 3 POLARIZED FILM**
This film blocks dangerous glare and protects from harmful UV rays all while delivering sharper colors.

BACK

- 1 UV PROTECTION LAYERS**
These layers provide maximum UV protection with an E-SPF® of 50+ while they minimize distracting glare from the back of the lens.
- 2 ANTI-PARTICULATE LAYER**
This anti-static layer repels dust and dirt particles from the surface of your lens, keeping them clean and clear.
- 3 SCRATCH RESISTANT BOOSTER LAYER**
An additional layer of glass-like silica particles protects lenses from annoying and unsightly scratches.
